OVER **60** YEARS  
OF INNOVATIVE TECHNOLOGY

## ORIGIN INTELLIGENT HOME OBSERVATORY

Celestron Origin stands at the forefront of a new era in amateur astronomy, blending stargazing and astrophotography into a single, user-friendly experience. This intelligent, all-in-one home observatory takes the complexity out of traditional telescopes, transforming your backyard into a gateway to the cosmos. Packed with cutting-edge technology, Celestron Origin captures the beauty of celestial objects and brings them to life on your phone or tablet.

Celestron engineers drew on their decades of expertise while designing every detail, from Origin's patented optical technology to its intuitive companion app. The result is a revolutionary new system that builds on Celestron's legacy and makes astronomy more accessible, exciting, and fun than ever before.

### KEY FEATURES

- + Stargazing and Astroimaging Redefined: Celestron Origin is an intelligent, all-in-one home observatory that captures stunning views of faint, deep-sky celestial objects and delivers them to your phone or tablet. The images you capture in seconds look better than what you'd see in the eyepiece of a much larger telescope under much darker skies
- + Revolutionary RASA Optical Technology: Origin's patented 6" Rowe-Ackermann Schmidt Astrograph (RASA) optical design places it in a class by itself. With its large aperture and fast f/2.2 focal ratio, you get unparalleled image brightness and clarity with less exposure time
- + Automatic, AI-powered Astrophotography: As Origin captures data, built-in AI algorithms autonomously stack and process every frame in real-time. Galaxies and nebulae instantly come to life—sharp, detailed, and in brilliant colour—all with no user intervention
- + Automated Setup with StarSense: To get started, place Origin outside, turn it on, and connect to the app. Using Celestron's patented StarSense technology, Origin scans the sky and autonomously focuses and aligns itself. You're ready to select a target and start imaging in less than two minutes
- + Intuitive App Interface: The user-friendly Celestron Origin app for iOS and Android, offers a simple yet powerful planetarium interface, making it easy to navigate the sky and control the system
- + Share the View with Everyone: Multiple users can use the Origin app to view the telescope's live feed simultaneously. You can also cast the view to your smart TV or save and share it instantly

# NEXSTAR<sup>®</sup> EVOLUTION

The Nexstar Evolution is the first Schmidt-Cassegrain telescope with integrated Wi-Fi. Leave your hand control behind and slew to all the best celestial objects with a tap of your smartphone or tablet. Connect your device to Nexstar Evolution's built-in wireless network and explore the universe with the Celestron mobile app for iOS and Android.

Celestron engineers designed Nexstar Evolution based on years of customer feedback. It offers many thoughtful design features that combine to provide you the best possible experience out under the stars.

Forget about batteries or an external power supply. For the first time ever on a consumer telescope, Nexstar Evolution includes its own built-in battery. With this ultra-long-life lithium-iron phosphate battery, you'll be able to enjoy stargazing marathons up to 10 hours on a single charge.

## KEY FEATURES

- + Explore the Universe and control your Nexstar Evolution telescope with the free Celestron SkyPortal app for iOS and Android!
- + Compact, portable 5 & 6-inch Schmidt-Cassegrain optical tube with StarBright XLT optical coatings
- + Computerized GoTo mount with high-performance worm gears and motors for improved tracking accuracy, along with reduced gear backlash
- + Rechargeable lithium-iron phosphate battery with enough power for 10 hours of continuous observing
- + Improved industrial design with manual clutches and integrated carry handles, plus the added convenience of two accessory trays and a USB charge port for your smart device

# NexStar® SE

With vivid orange tubes in four apertures on a smooth computerised alt-azimuth mount.

Pair that with StarBright XLT optical coatings, SkyAlign and the Nexstar SE range becomes a reliable all-round setup that astronomers of all experience levels will take out again and again to experience our solar system and beyond.

## KEY FEATURES

- + Maksutov-Cassegrain & Schmidt optical tube with StarBright XLT optical coating
- + SkyAlign alignment technology
- + Computerised alt-azimuth mount with quick release fork arm mount, built in wedge (on 4SE & 5SE models), 40,000 object database and flash-upgradable NexStar+ hand control
- + StarPointer finder scope 1.25" star diagonal and 1.25" 25mm eyepiece
- + Sturdy pre-assembled steel tripod with accessory trays
- + The SkyX – First Light Edition astronomy software with 10,000 object database and printable sky maps

# NexStar® SLT

The sturdy single fork arm mount anchors your telescope, providing improved stability and performance. The NexStar SLT is a precision instrument that can grow with you in the hobby of amateur astronomy for years to come.

## KEY FEATURES

- + Refractor, Newtonian reflector and Maksutov-Cassegrain optical tubes with all glass coated optics
- + SkyAlign technology
- + Computerised alt-azimuth mount with quick release fork arm mount
- + Auxiliary port for additional accessories
- + 4,000 object database and flash upgradable NexStar+ hand control
- + StarPointer finder scope, 1.25" star diagonal and two 1.25" eyepieces – 25mm & 9mm
- + Sturdy pre-assembled steel tripod and accessory tray
- + The SkyX – First Light astronomy software with 10,000 object database and printable maps

# INSPIRE™

The ultimate telescope for the novice to intermediate astronomer. Packed with features never seen before on entry level telescopes, Inspire features fully coated glass optics, a solid altazimuth mount with a unique asymmetrical design, a sturdy steel tripod with integrated fold-up accessory tray, an integrated smartphone adapter, built-in red LED flashlight, large projected reticle finderscope, erect image optics, and a focus micrometer for easily returning to the same focus point.

## KEY FEATURES

- + Easiest setup of any entry level scope. With the folding accessory tray you just pop the tripod legs open, turn the lock knob and you're ready to go
- + Bold new design - The main telescope lens cap comes with a fully integrated smartphone adapter built-in, perfect for the budding astrophotographer. The asymmetrical mount design offers light weight and incredible stability. Erect image optics enables a fully correct image for easy viewing day or night, terrestrial or astronomical
- + Red LED flashlight - Stowed in the centre of the mount head, the flashlight can be used to gently illuminate the accessory tray or can be removed for use as a spotlight when needed
- + Focus micrometer - Allows quick return to a specific focus point for specific targets (bird nests, infinity focus, etc.)

| ITEM CODE | MODEL                   | OPTICAL CONSTRUCTION | APERTURE | FOCAL LENGTH | MOUNT TYPE | OPTICAL COATING | EYEPIECE INC. | SRP INC. VAT |

# COMETRON™

Get ready for the next awe-inspiring comet with a pair of sleek, portable Celestron Cometron 7x50 binoculars. The large 50 mm objective lenses and multi-coated optics offer amazing light-gathering capabilities that bring celestial objects into bright, sharp focus, making them ideal for comet watching, stargazing, and viewing craters on the Moon.

## KEY FEATURES

- + Wide field of view reveals a larger portion of the night sky, allowing you to view more of the comet's impressive tail
- + Large 50 mm objective lenses have tremendous light-gathering ability, ideal for astronomical use

EclipSmart solar products feature Solar Safe filter technology providing the ultimate protection from harmful solar radiation, including both IR and UV light, and filters 99.999% of visible light. Celestron Solar Safe filter technology is GUARANTEED SAFE for direct solar observation and has been independently tested by SAI Global Assurance Services.

## KEY FEATURES

- + Premium EclipSmart Solar Binoculars featuring Solar Safe filter technology for guaranteed safe observation of the Sun
- + Dual lens non-removable glass solar filters fully meet ISO12312-2 - Safe viewing of the sun when used in accordance with the included instructions

# SKYMASTER® PRO

SkyMaster Pro uses superior optics, coatings, internal parts and housing materials. With large objective lenses, BaK-4 prisms and fully multi-coated optics utilizing Celestron's proprietary XLT coating technology, Filter threads on the eyepieces make SkyMaster Pro a versatile astronomy binocular, allowing you to attach standard 1.25" filters to minimize the effects of light pollution, reduce the brightness of the moon or diminish glare when looking over water.

## KEY FEATURES

- + Detachable RSR rail for attaching an optional red dot finderscope
- + Rubber armoured for improved ergonomics and protection from every day use in the field
- + Waterproof and nitrogen purged for use in all weather conditions

# SKYMASTER®

The SkyMaster series of binoculars have multi-coated optics and high index BaK-4 prisms for superb light transmission and increased contrast and resolution. Coupled with large objective lenses, BaK-4 prisms offer amazing light gathering capabilities making them ideal for stargazing and other low-light applications. With higher magnifications than standard binoculars, SkyMaster 12x60 brings celestial objects up close, providing images with outstanding detail. View the heavens and the world around you with the SkyMaster Series.

## KEY FEATURES

- + Ultra sharp focus across the field of view
- + Multi-Coated optics for sharp, clear views
- + Suitable for terrestrial or astronomical viewing
- + Protective rubber covering for ultra-firm grip
- + Large centre focus knob for easy focusing
- + Tripod adapter included
- + Long eye relief ideal for eyeglass wearers
- + Carrying case included for travel and safe storage

## IDEAL FOR

# SKYMASTER® PRO

Celestron SkyMaster Pro ED binoculars are the ideal choice for amateur astronomers or anyone who observes at great distances. The SkyMaster Pro ED uses superior optics, coatings, internal parts, and housing materials. With large objective lenses, BaK-4 prisms, ED glass, and fully multi-coated optics utilizing Celestron's proprietary XLT coating technology, the view through a SkyMaster Pro ED sets the standard for astronomy binoculars.

## KEY FEATURES

- + Celestron's legendary SkyMaster binoculars get an upgrade with ED objective lenses for superior images virtually free of chromatic aberration with lifelike colour, increased resolution, and improved contrast
- + Available in 50mm, 70mm & 80mm objective lenses offer excellent light-gathering ability—perfect for astronomy
- + Threaded eyepieces accept all standard 1.25" astronomical eyepiece filters to bring out details or reduce the effects of light pollution
- + BaK-4 prisms and fully multi-coated optics with XLT coatings boost light transmission through the optical path for brighter, more detailed images
- + The widely spaced objective lenses of the Porro prism optical design provide an enhanced 3-D view
- + Glasses-friendly with generous eye relief and padded twist-up eyecups
- + Durable rubber-armoured housing with improved ergonomics for comfortable use in the field
- + Tripod-adaptable for extended viewing sessions

# LANDSCOUT™

LandScout binoculars are great, all-purpose binoculars at an affordable price that can bring a new level of enjoyment to almost any activity: sporting events, sightseeing, birding and wildlife observation, hiking, and more! Inside the LandScout are two pairs of Porro prisms, reflective optical prisms that take the form of a right-angle triangle with two sides of equal length. Porro prisms make binoculars more compact without compromising focal length or the transit of the light rays as they pass through it giving it the classic “broad-shoulder” shape of a traditional binocular. Our Porro prisms are constructed of K9 optical glass, which provide high reflectivity so that more light passes through the optical path to your eye.

LandScout also contains other optical surfaces treated with special coatings to boost light transmission even more. The result is a brighter view than uncoated binoculars. Whether you’re out on the trail or inside a crowded stadium, you want a binocular that is comfortable to hold and use over long periods, without fear of bumps or drops. LandScout features a lightweight and durable armour-protected chassis. Its tough, rigid frame is coated with rubber to stand up to hard use in the field. The LandScout is also water resistant and can repeatedly stand up to unexpected conditions.

## KEY FEATURES

- + K9 Prisms and Coated Optics, image enhancing optical coatings for bright, colour-rich views
- + Close Focus – Detailed, up close observation of subject in close proximity
- + Adjustable Rubber Eyecups – whether you wear glasses or not, maximize your field of view by adjusting the rubber eyecups.
- + Wide field of view allows you to take in the whole scene
- + Ergonomic body – Rubber armour grip surface for extra non-slip comfort and ease of use

# Outland<sup>®</sup> X

Celestron's mid-size Outland Series was designed to meet the needs of every outdoor enthusiast, from birders and hunters to sports fans to travellers. The optics are multi-coated to obtain high resolution and high contrast views. The prism are made of BaK-4 glass to give you enhanced colour fidelity. The rubber covered Outland X allows for rough and tough handling and the binoculars are waterproof and fogproof and are nitrogen purged for using in all weather environments. Large focus knobs make for easy and precise focusing and twist-up eyecups allow for quick adjustment of eye relief to obtain the full field of view.

## KEY FEATURES

- + Multi-Coated Optics
- + Waterproof and Fog-proof
- + Protective Rubber Covering
- + Twist-up Eyecups for Quick Adjustment
- + Moisture Resistant Neoprene Carrying Case

## NATUREDX

Celestron's Nature DX 10x42 binoculars are the perfect companion for your next outdoor adventure. A great first step into the world of serious sport optics, the views through Nature DX rival those of more expensive binoculars, at a price to fit your budget. With phase-coated BaK-4 prisms and fully multi-coated optics, Nature DX reveals image detail you won't find with other entry-level binoculars. And when you're off the trail, enjoy superb views of concerts, sporting events, and more.

### KEY FEATURES

- + BaK-4 Prisms with Phase Coating: Increases contrast and resolution for sharper more detailed images
- + Fully Multi-Coated Optics: Allows maximum light transmission through the optical path for brighter images
- + 6.5' Close Focus: Detailed, up close observation of subjects in close proximity. Ideal for watching birds, insects, plants, etc.
- + Compact and Lightweight: Fits in a pocket or glove box. Easy to carry on long excursions
- + Wide Field of View: Allows user to quickly acquire the subject being viewed. More viewing area and less need to move the binocular to follow subjects. Easier to follow subjects when they move
- + Twist-up Eyecups: Twist up and down with multiple stops for correct positioning of the users eyes for comfortable viewing with or without eyeglasses
- + Polycarbonate frame: Strong and durable polycarbonate body. Provides structural integrity while keeping the weight to a minimum

# NATUREDX

This versatile, all-around binocular is a great choice for the trail, the stadium, the arena, or just about anywhere you want a close-up view of the action without sacrificing brightness or detail. It's an especially great companion for nature observation and bird watching, with ED glass that helps you spot the subtlest field markings and a close focus of just 6.5 feet.

Extra-Low Dispersion (ED) glass virtually eliminates chromatic aberration, also known as colour fringing, a visual defect common in binoculars. Nature DX ED delivers razor sharp images, even at the edges of the field of view. ED glass is also known for producing images with outstanding, true-to-life colour.

Not all ED glass is created equal. Celestron's high quality ED glass delivers visibly brighter, sharper images compared to non-ED binoculars. The difference is especially apparent in low light conditions, such as at dawn or dusk.

## KEY FEATURES

- + Extra-Low Dispersion (ED) objective lenses provide high resolution, high contrast images that are virtually free of optical defects like chromatic aberration (colour fringing)
- + Fully multi-coated optics deliver maximum light transmission through the optical path
- + Phase coated BaK-4 prisms produce vivid, true-to-life colours
- + Eyeglass friendly - generous eye relief and sturdy, twist-up eyecups with multiple stops
- + 6.5' close focus
- + Tripod adaptable

# TRAILSEEKER™

TrailSeeker binoculars provide high-level outdoor performance, making them perfect for the avid birder. The TrailSeeker is a feature-rich binocular with superb optical quality at an economical price. Phase and dielectric coated BaK-4 prisms dramatically increase light transmission through the prism system for unrivalled image quality and views. Compared to other binoculars in its price range, TrailSeeker offers a better close focus along with a wider field of view. The lightweight magnesium alloy frame is durable and fully waterproof for use in any weather condition.

## KEY FEATURES

- + Magnesium Alloy Body: lightweight, durable frame that will last a lifetime and handle use in the field
- + BaK-4 Prisms with Phase and Dielectric Coatings: Increased light transmission through the prism system for brighter images. Increased contrast and resolution
- + Wide Field of View: Quickly acquire the subject being viewed. Follow your subject more easily, with less need to move the binoculars
- + Ergonomic Design
- + Fully Multi-Coated Optics: Increased light transmission for brighter views and more resolution
- + 6.5' Close Focus: Detailed, up close observation of subject in close proximity
- + Metal Multi-Stop Twist Up Eyecups: More durable with a longer life than plastic eyecups. Multiple stops for correct positioning of the eyes
- + Tripod Adaptable: Attach your TrailSeeker to a tripod for extended viewing sessions

# TRAILSEEKER™

The TrailSeeker ED binocular provides high-level outdoor performance—a perfect choice for avid birders and outdoor enthusiasts. TrailSeeker ED is packed with optical, mechanical, and ergonomic features that make it comparable to binoculars costing two to five times as much.

## ED OBJECTIVE LENSES

Extra-Low Dispersion (ED) glass virtually eliminates chromatic aberration, also known as colour fringing, a visual defect common in binoculars. TrailSeeker ED delivers edge-to-edge sharpness with excellent colour correction and razor-sharp images.

Not all ED glass is created equal. Celestron's high quality ED glass delivers visibly brighter, sharper images compared to non-ED binoculars. The difference is especially apparent in low light conditions, such as at dawn or dusk.

## COATINGS AND PRISMS

TrailSeeker ED features fully multi-coated optics and phase- and dielectric-coated BaK-4 prisms. A binocular can be considered “fully multi-coated” when all air-to-glass surfaces are coated with multiple layers of anti-reflectivity coatings so that the maximum amount of light passes through the glass to the eye.

The prism inside TrailSeeker ED is made of high quality BaK-4 glass with both phase and dielectric coatings so that more light is reflected off the prism and diverted through the eye. Taken together, fully multi-coatings and BaK-4 prisms maximize light transmission for the brightest, most detailed images possible.

## THE BODY

TrailSeeker ED is composed of lightweight and durable magnesium alloy. Its tough, rigid frame is coated with rubber to stand up to hard use in the field. What's more, the binocular is fully waterproof and filled with dry nitrogen gas to prevent internal fogging of lenses. TrailSeeker ED can stand up to even the toughest outdoor conditions.

Viewing through TrailSeeker ED is comfortable for both eyeglass wearers and non-eyeglass wearers alike, thanks to the durable twist-up eyecups. Twist through multiple click stops to find the position that works best for you.

# REGAL™

Regal ED Flat Field Binoculars build on the success of Celestron’s customer-favourite Regal ED spotting scope line. With both ED objective lenses and flat field lenses, these binoculars provide sharp, expansive views and of a high degree of accurate colour resolution. As Celestron’s new premier line of performance-level field binoculars, the Regal ED Flat Field Binoculars are designed with the most selective of all binocular users in mind: birders. From their vivid, true-to-life colour resolution, expansive fields of view for ease of locating fast moving objects, and 4.9 foot close focus distance to get an even closer look when a subject suddenly pops out of the bushes and right on the trail in front of you, the Regal ED binoculars provide everything needed for the most selective of binocular users – which ensures that they’re up to the challenge across a wide-range of other activities.

## KEY FEATURES

- + Extra-Low Dispersion (ED) objective lenses provide high resolution, high contrast images that are virtually free of optical defects such as chromatic aberration (colour fringing)
- + Flat field technology ensures level, edge-to-edge image clarity
- + Fully multi-coated optics deliver maximum light transmission throughout the optical path
- + Phase and dielectric coated BaK-4 prisms produce vivid, true-to-life colours.
- + Eyeglass friendly - generous eye relief and sturdy, twist-up eyecups with multiple stops
- + Well-balanced, ergonomic industrial design
- + 4.9’ close focus
- + Tripod adaptable

# TRAILSEEKER™

The Trailseeker spotting scope series offers an amazing viewing experience in a rugged and durable rubber armoured housing that is fully waterproof and Nitrogen filled. The optical system with proprietary XLT multi-coatings renders high resolution images with outstanding contrast while the dual focus mechanism allows you to get subjects in focus quickly and then fine tune the image. The Trailseeker offers numerous features normally found only in much higher priced spotting scope models, including a sliding sunshade, rotating tripod mount, and interchangeable eyepiece. The Trailseeker is the perfect companion for anyone who enjoys the outdoors.

## KEY FEATURES

- + Celestron's proprietary XLT fully multi-coated optics increase light transmission through the optical path to deliver crisp, high contrast images
- + Focus on a subject quickly, then fine tune the image using the dual focus mechanism with course and fine adjustments
- + Get the whole picture using the rotating tripod mount. This mount rotates a full 360° and allows the eyepiece to be set in any viewing position
- + Get close to the action with a zoom up to 67x magnification (100mm) or see the widest field of view at 16x (65mm)
- + Perfect for those who want performance in an easy-to-carry package

## HUMMINGBIRD™

The first truly “micro” spotting scope, Celestron’s new Hummingbird Micro ED and non ED spotter models will easily fit into your pocket, shoulder bag, or carry-on luggage. This spotting scope is perfect for traveling birders and outdoor enthusiasts as a lightweight alternative to a full-size spotter. Fully multi-coated and nitrogen purged, ED glass for bright, clear views, an adjustable zoom lens, tripod ready, and with the included carrying case and strap, you can keep moving with Hummingbird.

### KEY FEATURES

- + Easily carried in vest or coat pocket, in belt pack, or shoulder bag
- + 9-27x magnification range spans binoculars and spotting scopes
- + “Birder-friendly” close focus distance: 10 ft. / 3m close focus satisfies birding field optic requirements
- + Waterproof / Nitrogen filled - Protected against wet weather, humid conditions, and other environmental challenges

### ED MODEL ONLY

- + ED lens optical system provides sharp, clear images with vivid, well-managed colour

# Regal™ M2

Extra-Low Dispersion (ED) glass meets our proprietary XLT fully multi-coated optics for bright images with true colour, virtually free of chromatic aberration. Set the zoom eyepiece in the perfect viewing position using the 360° rotating tripod mount with detents. Then, rapidly bring subjects into focus with the dual-focus mechanism. A stay-on carrying case provides protection, even when your Regal M2 is mounted on a tripod.

## KEY FEATURES

- + ED Objective Lens: Minimizes chromatic aberration, accurate colour reproduction, increased resolution and contrast
- + XLT Coatings (Fully Multi-Coated Optics): Proprietary XLT lens coatings maximize light transmission through the optical path for brighter images and increased resolution and contrast
- + Magnesium Alloy Body: This material is strong and durable, but lighter weight than traditional aluminium alloy housings
- + Dual focus: Course focus for rough adjustment and fine focus for detailed adjustment. New quicker focusing mechanism
- + Rotating tripod mount with detents: Place the orientation of the eyepiece in the best viewing position for application

# CATADIOPTIC

It doesn't get much more portable than these grab-and-go spotting scopes. A great first optic that's easy for beginners to use, our Mini Maks also work well on the shooting range. They include a tabletop tripod and carrying case, so you can pack them up for easy transport. The Schmidt-Cassegrain and Maksutov-Cassegrain optical models of these popular spotting scopes mean you get lots of light gathering ability in a compact package. Plus, you can add any standard 1.25" astronomical eyepiece for high magnification views. Both spotting scopes fit easily in a pack, and can even do double duty as telescopes for night time viewing!

## KEY FEATURES

- + Maksutov-Cassegrain optical design with multi-coated optics
- + Waterproof
- + 45° Eyepiece
- + 1.25" eyepiece adapter allows usage of any 1.25" eyepiece
- + Table top tripod with C70 & C90 models
- + Soft carrying case

## 1 HUMMINGBIRD MONOPOD

- + Twist-lock monopod with four leg sections and thread mounting stud, perfect for optics and photographic equipment
- + Wrist strap and belt clip for secure use and easy carrying in the field
- + Comes with two interchangeable feet, one metal foot spike and one padded foot—so you can use the monopod on any surface
- + Specially designed protective case for storage and transport

## 2 ULTIMA DELUXE TRIPOD

- + A stable-yet-lightweight, versatile, and easy-to-use tripod perfect for just about any application
- + Smoothly pan the horizon or tilt the viewing angle up and down with two directional adjustments—even flip your optic sideways
- + Extendable centre column provides even more height when needed
- + Customize the configuration of your tripod to fit any viewing conditions: three leg sections allow the tripod to work with virtually any user or terrain
- + Includes a specially designed, protective carrying case for storage and transport
- + Quick-release mounting plate allows you to attach your optic to the tripod in seconds and switch between optics with ease

## 3 HUMMINGBIRD TRIPOD

- + A stable-yet-lightweight, versatile, and easy-to-use tripod perfect for just about any application
- + Smoothly pan the horizon or tilt the viewing angle up and down with two directional adjustments—even flip your optic sideways
- + Extendable centre column provides even more height when needed
- + Customize the configuration of your tripod to fit any viewing conditions: four leg sections and three leg angles allow the tripod to work with virtually any user or terrain
- + Includes a specially designed, protective carrying case for storage and transport
- + Quick-release mounting plate allows you to attach your optic to the tripod in seconds and easily switch between optics

## 1 TRAILSEEKER TRIPOD

- + Perfect support for a spotting scope, binocular, camera, or small telescope
- + Sturdy aluminium tripod adjusts in height from 18.9 inches to 70.5 inches and includes a two-way fluid pan head with quick release plate
- + Comes with a tripod case and shoulder strap
- + The four-section legs can be set to three different angles and use quick & easy flip lever locks for length adjustment
- + The centre column can be extended when additional height is needed. A retractable hook lets you add weight if extra stability is required

## 2 REGAL PREMIUM TRIPOD

- + Perfect support for a spotting scope, binocular, camera, or small telescope
- + The centre column can be extended when additional height is needed. A retractable balance hook lets you add weight if extra stability is required
- + Tripod case and shoulder strap included
- + Sturdy aluminium tripod adjusts in height from just over 18 inches to nearly 69 inches and includes a two-way fluid pan head with quick release plate that doubles as a balance rail
- + The four-section legs can be set to three different angles and use quick and easy flip lever locks for length adjustment

## 3 HEAVY DUTY ALT/AZ TRIPOD

The aluminium legs of the Celestron Heavy-Duty Alt-Az Tripod are fully adjustable to best match the height you require. Minimum height is 32 inches, and the maximum extended height is 45 inches. A centre brace stabilizes the legs in place when the tripod is open, and a metal accessory tray is fitted to the centre of the brace, or spreader bars, allowing you to store a few accessories close at hand. Weight capacity is 10lb.

## 4 BINOCULAR TRIPOD ADAPTER - ROOF AND PORRO PRISM

This adapter allows you to mount your binocular (porro or roof) to a tripod for added stability and convenience.

# MICROSCOPES

## EDUCATION

# LABS

## 1 LABS CM800 MICROSCOPE

- + Lab-ready compound microscope with 800x power
- + 10x and 20x eyepieces with 4x, 10x and 40x objective lenses
- + View specimens at 40x, 100x, 250x, 400x, 800x magnification
- + Built-in, adjustable, upper and lower LED illumination
- + 3 AA batteries included for field use
- + 10 prepared slides included

## 2 LABS CL-CB1000CF MICROSCOPE

- + Lab-ready compound binocular microscope with up to 1000x power
- + 4 fully achromatic objective lenses: 4x, 10x, 40x, 100x
- + Coarse and fine focus knobs
- + 10x eyepieces allow you to view specimens at 40x, 100x, 400x and 1000x
- + All-metal construction with fully mechanical stage
- + Adjustable binocular head
- + Built-in, adjustable LED lower illumination with Abbe condenser and iris diaphragm

## 3 LABS CB2000CF - BINOCULAR MICROSCOPE

- + Lab-ready compound binocular microscope with 2000x power
- + 10x and 20x eyepieces (10x with pointer)
- + 4 fully achromatic objective lenses- 4x, 10x, 40x, 100x
- + View specimens at 40x, 80x 100x, 200x, 400x, 800x, 1000x and 2000x magnification
- + Adjustable Binocular head
- + All-metal construction with fully mechanical stage
- + Coarse and fine focus knobs
- + Built-in, adjustable halogen lower illumination with Abbe condenser and iris diaphragm
- + Universal AC adapter included

## 4 LABS CB2000C - BINOCULAR MICROSCOPE

- + Professional-grade compound binocular microscope with 2000x power
- + 10x and 20x eyepieces
- + 4 fully achromatic objective lenses
- + View at 40x, 80x 100x, 200x, 400x, 800x, 1000x & 2000x magnification
- + All-metal construction with fully mechanical stage and coaxial focus
- + Coarse and fine focusing knobs
- + Built-in, adjustable halogen lower illumination with Abbe condenser and iris diaphragm

# LABS

## 1 LABS S20 - STEREO MICROSCOPE

- + Great introductory stereo microscope with 20x power
- + 10x eyepieces with 2x objective lenses
- + Metal head with coarse focusing knob
- + Upper LED illumination for detailed viewing
- + Two insect specimens included
- + Two AA batteries included

## 2 LABS S10-60 - STEREO MICROSCOPE (MULTIPLUG VERSION)

- + Professional-level stereo microscope up to 60x power
- + Two sets of 10x and 20x eyepieces
- + Two sets of objective lenses: 1x and 3x - in-rotating housing
- + View specimens at 10x, 20x, 30x and 60x magnification
- + Four insect specimens included
- + Full-metal construction with coarse focusing knob
- + Upper and lower illumination for full range of viewing
- + Two stage plates included: (1) transparent stage for bottom illumination and (1) black and white sides for enhanced viewing

- 1 LABS DELUXE HANDHELD DIGITAL**
- + USB-powered handheld digital microscope
  - + Built-in 2MP digital camera for capturing images and videos
  - + Use the included Windows software to capture images and video of your discoveries.
  - + Measure your specimens with built-in measurement tool
  - + Computer requirements: CD/DVD drive and USB 2.0 port. UVC plug-and-play with Windows 7, Vista, and XP. Also compatible with Mac OSX 10.4.9 and above (without measurement feature)
  - + 10x to 40x magnification
  - + 6 LED ring illuminator

- 2 LABS HANDHELD DIGITAL MICROSCOPE PRO**
- + True 5MP sensor to capture and save high-resolution images and videos of your specimens
  - + 5-Element IR cut high-quality glass lens ensures sharper images
  - + 20x to 200x powers, great for low-power observation of 3D specimens (Note: Final magnification determined by monitor size)
  - + Professional, adjustable height stand included for hands-free operation
  - + 4 foot USB 2.0 cable for easy manoeuvrability when viewing large surfaces
  - + Intuitive software with measuring features
  - + Windows and Mac compatible

- 3 LABS MICRODIRECT 1080P HD HANDHELD MICROSCOPE**
- + 1080p video streaming of microscopic worlds via included HDMI cable directly to your monitor or projector. **NO COMPUTER NEEDED!**
  - + 3.5MP high speed sensor has larger pixel sizes that allow more details and a higher refresh rate
  - + 10x to 220x power magnification
  - + Records high definition still images. Images are saved directly to a Micro SD card (not included)
  - + Capture 720p High Definition video at 30fps when connected to a PC via USB

1

**LCD DIGITAL MICROSCOPE II**

- + Professional digital biological microscope
- + Full colour 3.5" TFT LCD screen with onboard software
- + Built-in 5MP digital camera captures high resolution images and 30fps SD video of your specimen
- + Fully adjustable mechanical stage for easy slide movement
- + 180-degree rotating head for easy sharing of images
- + Rotating objective lens turret 3 lens powers: 4x, 10x, and 40x

- + Camera sensor acts as 10x eyepiece lens, yielding 40x, 100x, and 400x powers
- + Measuring reticle for comparing specimen sizes
- + 1 GB SD card included so you can save up to 620 high-res images supports up to 32GB card
- + TV output for display on large monitors for classroom or lab environment
- + Included accessories: 1 GB SD card, dust cover, canvas carrying case with shoulder strap, 5 prepared slides, 4 plug international AC adapter

2

**TetraView™ LCD DIGITAL TOUCH SCREEN MICROSCOPE**

- + 40x to 400x magnification (up to 1600x with digital zoom)
- + 4.3" LCD touch screen
- + 5 MP CMOS built-in digital camera
- + 4 fully achromatic objective lenses: 4x, 10x, 20x, 40x
- + Adjustable LED bottom illumination
- + 180° rotatable LCD screen
- + Fully mechanical stage
- + Coarse and fine focus knobs
- + Filter wheel/diaphragm

- + AV/TV output
- + Battery power option (4AA batteries)
- + 2 GB SD card included (SD card slot supports up to 32 GB)
- + Universal AC adapter with multi-plugs for international usage
- + Accessories included: 7 prepared slides, hard carrying case, dust cover, touch pen, USB cable

3

**PentaView™ LCD DIGITAL MICROSCOPE**

- + 40x to 600x magnification, (up to 2400x with digital zoom)
- + 4.3" LCD touch screen
- + 5 MP CMOS built-in digital camera
- + 5 fully achromatic objective lenses: 4x, 10x, 20x, 40x, 60x
- + Top & bottom adjustable LED illumination
- + 180° rotatable LCD screen
- + Fully mechanical stage

- + Coarse and fine focus knobs
- + Filter wheel/diaphragm
- + AV/TV output with cable
- + Optional battery mode
- + SD card slot with 4 GB SD card included
- + Universal AC adapter with multi-plugs for international usage
- + Accessories included: 10 prepared slides, hard carrying case, dust cover, touch pen, USB cable

# LABS

## LABS DIGITAL WI-FI MICROSCOPE

The Celestron Labs Digital Wi-Fi app will be available for download from both Google Play and the Apple App store. The easy to navigate application allows for live streaming, recording still images, and capturing video of your specimens.

- + Desktop Wi-Fi digital microscope
- + Trinocular objective turret with 3 fully achromatic objectives (4x, 10x, 40x)
- + Built in Wi-Fi module
- + 2MP sensor
- + Celestron Labs Digital app supports Android and iOS smart devices
- + Smart device holder can attach magnetically to microscope head or be placed on table
- + Magnetic connection allows for 360° rotation
- + Abbe condenser
- + Fully mechanical stage
- + Includes 5 prepared slides
- + Calibration slide
- + Multi-plug international AC adapter

Tablet Device not included

## 1 DIGITAL MICROSCOPE IMAGER HD 5MP

In the classroom, lab, and for any person who has a traditional microscope, Celestron's 5MP Digital Microscope imager is the perfect tool to capture high resolution images and 30 fps video. Simply assemble the adjustment collar and the imager will replace any standard 23mm or 30mm eyepiece and plug directly into your Mac (2MP max.) or Windows (full 5MP) PC via standard USB. The Digital Microscope Imager software allows you to easily shoot, save, and share quality images and video and even make notes and highlight areas of your specimen for use in reports or presentations.

- + Simple, rugged aluminium housed 5MP CMOS sensor
- + Replaces the eyepiece on your microscope, turning your traditional microscope, with 23mm or 30mm eyepieces, digital
- + Takes high res still images & 30fps video\*
- + USB powered - Connects to your personal computer via open USB port
- + Robust software with new features like measurement, calibration, note taking and 'comparison' featuring comparing 2 live streams

## 2 LABS DIGITAL- WI-FI MICRO IMAGER

The new Wi-Fi digital microscope imager is equipped with a 2MP sensor and built in Wi-Fi allowing for wireless observation and capturing of still images and video to a smartphone or tablet. Both are compatible with iOS and Android devices.

- + Universal imager works with most optical microscopes
- + 2MP sensor
- + Built in Wi-Fi module
- + Celestron Labs Digital app supports Android and iOS smart devices
- + Rechargeable 100 mAh Lithium-ion battery
- + 3 hours of continuous viewing on a full charge
- + USB-C cable for charging
- + 30mm adapter for stereo microscopes
- + Calibration slide

## 3 PREPARED SLIDE BOX

Our prepared slide kits will provide hours of enjoyment and discovery. Each prepared glass slide includes an insect, plant, or animal specimen, along with a descriptive label. Your slides are protected in a sturdy wooden box to keep them safe and organized. Available in 25 or 100 pieces.

| 44410-CGL | Prepared Slides - 25 piece box   | £109.99      |

# ACCESSORIES

## NEXIMAGE 20MP - SOLAR SYSTEM IMAGER

Capture your own stunning images of the planets, Moon, and Sun (with solar filter) with the Celestron NexImage 20. Our team engineered this high-performance USB camera for serious astrophotography. With a powerful 20 MP back-illuminated CMOS sensor, NexImage 20 captures ultra-high-resolution images at 5240 x 3840 pixels, giving you crisp, detailed results ready for stacking, printing, and sharing online.

NexImage 20 is one of the best values in Solar System imaging today, delivering impressive detail and producing images that rival those from cameras costing hundreds more. It's an excellent way to get started with astroimaging—even from light-polluted city skies. If you can see a planet through your telescope, you can capture it with NexImage 20!

### Key Features

- + **CAPTURE ULTRA-HIGH-RES IMAGES & VIDEO:** Intuitive yet powerful, this camera captures detailed 20 MP (5240 x 3840) stills and smooth AVI video of the planets, Moon, and Sun (with a solar filter). Easily stack your frames, create high-quality prints, or share your results online.
- + **HIGH-PERFORMANCE SENSOR FOR SHARPER DETAIL:** The Onsemi AR2020 back-illuminated CMOS sensor features 1.4  $\mu\text{m}$  pixels on a 7.3 x 5.4 mm sensor. With 8.7 ke-/lux-sec sensitivity, it captures crisp detail even in challenging seeing conditions.
- + **INSTANTLY COMPATIBLE WITH YOUR TELESCOPE:** NexImage 20 slides directly into your telescope's 1.25" eyepiece holder using the included nosepiece—no adapters needed. Capture sharp, high-resolution photos and smooth planetary videos right at the focal plane.
- + **ZOOM IN ON THE DETAIL WITH REGION OF INTEREST (ROI):** Crop the frame to capture just your target—perfect for small objects like planets. ROI increases frame rate for smoother video, reduces file size, and speeds up stacking and post-processing.
- + **EASY USB CONNECTION TO YOUR COMPUTER:** Simply connect the NexImage 20 to your Windows PC via the included USB-A to USB-C cable.
- + **DUAL-PURPOSE: IMAGING + AUTOGUIDING:** NexImage 20 doubles as a capable autoguider, helping your telescope stay locked on target during long-exposure astrophotography. For advanced users with additional guiding hardware, it adds precision tracking to your setup.
- + **iCAP SOFTWARE INCLUDED:** Capture, preview, and save your images and video with iCap—Celestron's dedicated imaging software for NexImage. Easily adjust exposure, gain, and frame rate, and take full control of your imaging workflow from your Windows PC.

# OMNI<sup>®</sup>

Celestron Omni series eyepieces offer a 52 degree apparent field of view, perfect for the moon, planets, and a plethora of deep-sky objects. The premium four-element optical set is finished with multiple layers of high-transmission coatings for clear, sharp images. The edges of the optics are blackened for increased contrast.

## KEY FEATURES

- + Omni eyepieces offer a quality 4-element Plossl optical design at a super affordable price
- + Rubber eyecups provide comfort and increase contrast. Leave them up or fold them down when wearing eyeglasses
- + Beautiful matte aluminium barrels and blackened lens edges prevent internal reflections
- + 1.25" barrels are threaded to accept filters

# X-Cel LX<sup>®</sup>

Celestron X-Cel LX series eyepieces offer a 60 degree apparent field of view, perfect for the moon, the planets, and a plethora of deep-sky objects. The premium six-element optical set is finished with multiple layers of high-transmission coatings for clear, sharp images. The edges of the optics are blackened for increased contrast. All seven X-Cel LX eyepieces sport 16 mm of comfortable eye relief, and are parfocal, which means you can switch out eyepieces within the series during observing sessions and little or no additional focusing will be required.

## KEY FEATURES

- + X-Cel LX eyepieces, optimized for planetary viewing, offer a 60 degree field of view through a six-element fully multi-coated lens system
- + Pop-up rubber eye guards provide comfort & increase contrast - raise & lower with a simple twist
- + A treaded rubber grip offers a no-slip grip, even with gloves on
- + 1.25" barrels are threaded to accept filters

# ULTIMA EDGE™

See the whole picture with Ultima Edge. These flat-field eyepieces were designed to provide an ultra-sharp, ultra-clear, crisp image from the centre all the way to the edge of the field of view. The 30mm Ultima Edge eyepiece features fully multi-coated optics and a 9-element, element lens design, maximizing light transmission.

The Ultima Edge 30mm has a generous 70° field of view perfect for viewing planets, stars and the Moon's surface. This eyepiece provides low power magnification, perfect for deep sky objects and a bright detailed view of the moon's surface.

## KEY FEATURES

- + Ultra Flat Field eyepiece designed for 2" focusers (30mm) & 1.25"
- + Incredibly crisp views from centre to edge of field
- + Fully multi-coated, 9-element lens design for excellent light transmission
- + Up to 70° apparent field of view allows you see more of the night sky
- + Generous 22mm eye relief and fold-down rubber eye guard for comfortable viewing with or without eyeglasses
- + Moulded rubber grip ring for non-slip handling

## luminos

The Luminos series eyepieces offer a wide 82 degree field of view in both high power and low power models, allowing you to make the most of your telescope. The optical set consists of six or seven elements (depending on the model) and is fully multi-coated for crisp, sharp views. All six Luminos eyepieces are parfocal, which means you can switch out eyepieces during observing sessions with little or no additional focusing required.

### KEY FEATURES

- + Enjoy wide 82 degree views with Celestron Luminos Eyepieces
- + Retractable eyecup pops up when you need it, drops down when you don't
- + Sturdy anodized aluminium barrels are threaded for filters
- + A rubber grip keeps the eyepiece securely in your hands, even when it's cold and have gloves on

| ITEM CODE | MODEL                           | TUBE DIAMETER | FIELD OF VIEW | NO. ELEMENTS | COATINGS           | SRP INC. VAT |

# SPECIALITY EYEPIECES

## 1 ZOOM EYEPIECE

The Celestron 8-24mm Zoom Eyepiece uses premium optics that are fully multi-coated for crisp, clear images. The folding eyecup lets you view with or without glasses, and the field of view (40 - 60 degrees) works well for terrestrial observations as well as for views of the moon, planets, and deep-sky objects.

## 2 COLLIMATION EYEPIECE

The Celestron Cheshire Collimation Eyepiece is ideal for precise collimation of Newtonians and helpful for aligning Schmidt-Cassegrains. This special eyepiece fits into 1 1/4" focusers or diagonals. Alignment is easy using the small opening on one end and thin cross hairs at the other end. The collimation eyepiece is more accurate than the simple Collimation Tool.

## 1 ECLIPSMART FILTERS

Enhance your viewing experience with Celestron's EclipSmart Solar Filter for Celestron 8" telescopes. With two Velcro straps and four self-adhesive Velcro pads for added safety, you can be assured that the solar filter cannot be accidentally knocked off and will provide Solar Safe, ISO compliant viewing.

## 2 MOON FILTER KIT, 1.25"

This Moon Filter Set contains all the filters you will ever need to observe the Moon during its various phases. The set allows you to choose the best filter to use with different eyepiece and telescope combinations. Use the darkest filter with larger aperture telescopes and lower magnification eyepieces. Use the lighter filters with smaller telescopes and higher magnification eyepieces.

## 3 EYEPIECE FILTER SET, 1.25"

Coloured filters can be used to bring out details on a planet's surface or its cloud structure. All of the planetary filters included in the Celestron Lunar and Planetary Filter Set can be used on any 1.25" eyepiece with the proper filter threads, so they are very versatile. Just screw one onto the eyepiece of choice and slide it into the focuser.

- + The aluminium cell is threaded on top and bottom for stacking.
- + Includes Wratten #12 Deep Yellow, #21 Orange, #80A Light Blue, and a #ND-96 0.3 Neutral Density Filter with 50% transmission.

## 4 MOON FILTER

A nice beginner's set of 1.25" planetary filters for any telescope. Reduce glare and contrast of the moon with the Celestron 1.25" Moon Filter. Also useful for extra bright planets as well as terrestrial viewing over sand or snow. Threads onto most 1.25" eyepieces in seconds.

| ITEM CODE    | MODEL                          | ACCESSORIES PER KIT | SRP INC. VAT |

## 1 UHC/LPR FILTER

Light Pollution Reduction Filters are designed to selectively reduce the transmission of certain wavelengths of light, specifically those produced by artificial light. This includes mercury vapour, and both high- and low-pressure sodium vapour lights and the unwanted natural light caused by neutral oxygen emission in our atmosphere (i.e. sky glow). Available in 2" and 1.25"

## 2 OXYGEN III NARROWBAND FILTER

O III narrowband filter isolates just the two doubly ionized oxygen lines emitted by planetary and emission nebulae, while blocking the rest of the overall spectrum of light. The result is extreme contrast between the black sky background and the faint photons of OIII light needed for detailed views of the Veil, Ring, Dumbbell, Crescent and Orion nebulae, among other objects. Available in 2" & 1.25"

## 3 VARIABLE POLARIZING EYEPIECE FILTER, 1.25"

When you want to selectively reduce the brightness of celestial objects for a customized view, the Variable Polarizing Filter is the perfect choice. Unlike regular Moon Filters and Neutral Density Filters, the level of brightness can be reduced to just 1% or as much as 40%.

## 4 NEUTRAL DENSITY FILTER, 1.25"

The Neutral Density Moon Filter attaches to a 1.25" eyepiece to lower the amount of light entering the eyepiece by 87%. The Moon is one of the most viewed objects in the sky, but you shouldn't be deprived of its features due to brightness.

| ITEM CODE | MODEL                                      | SRP INC. VAT |

## 1 POWERTANK LITHIUM PRO

- + Extra-large capacity portable power pack featuring Celestron's LiFePO4 battery technology
- + Powers your telescope for up to 17 hours
- + USB device charging supports QuickCharge 2/3 and Adaptive Fast Charge to give you the fastest device charging possible
- + Features 2 USB ports for charging other devices, plus a 12V car battery adapter port
- + LED light panel provides bright white or red LED illumination for up to 25 hours
- + Perfect for astronomy, camping, emergency kits, anywhere you need portable power
- + Meets current FAA regulations for carry-on baggage
- + Battery shuts off automatically when insufficient current flow is detected to prevent you from inadvertently draining your battery

## 2 POWERTANK LITHIUM

- + Portable power pack for your computerized Celestron telescope using Lithium-Iron Phosphate (LiFePO4) chemistry
- + Powers your telescope for up to 10 hours
- + Smaller, lighter, safer, and easier to maintain than lithium-ion and sealed lead acid designs
- + Environmentally friendly – Does not use toxic heavy metals
- + Up to 2000 charge cycles – four times more than lithium-ion and 7 times more than sealed lead-acid designs
- + Un-recharged shelf life of up to 10 years – 3 times better than lithium-ion and 10 times better than sealed lead-acid designs
- + Battery shuts off automatically when insufficient current flow is detected to prevent you from inadvertently draining your battery

## 3 POWERTANK LITHIUM LT

- + Our most compact, lightweight, and portable lithium power pack
- + The built-in 12 volt regulating circuit Provides your telescope with up to 8 hours of consistent power at the proper voltage for optimum telescope performance
- + Comes with a rapid charge USB port for fast-charging your electronic devices in the field
- + Meets current FAA carry-on baggage regulations

## 4 POWERTANK MINI 5000

- + Portable power pack for your computerised Celestron telescope using Lithium Iron Phosphate (LiFePO4) chemistry
- + Un-recharged shelf life of up to 10 years – 3 times better than lithium-ion and 10 times better than sealed lead-acid designs
- + Smaller, lighter, safer, and easier to maintain than lithium-ion and sealed lead acid designs
- + Up to 2000 charge cycles – four times more than lithium-ion & 7 times more than sealed lead-acid designs
- + Environmentally friendly – Does not use toxic heavy metals

## 1 POWERTANK 17

- + 17 amp-hour power supply for your Celestron telescope
- + 2 x 12V DC output car jack socket
- + Built-in AM/FM Radio and Siren Built-in (2) USB ports for charging portable devices
- + Energy efficient LED spotlight
- + Removable red filtered flashlight with magnetic back
- + Handy jump-start system (cables not supplied)
- + Built-in circuit breaker for safety
- + Cigarette lighter adapter included
- + Switchable 110v-220v AC adapter

## 2 POWERTANK

- + 7-amp hour
- + Two 12V output cigarette lighter ports
- + Built-in flashlight with red filter cap
- + Built-in (2) USB ports for charging portable devices
- + Energy efficient LED spotlight
- + Booster terminal on rear side
- + Built-in Circuit Breaker for safety
- + Cigarette lighter adapter included
- + 110 V/220 V switchable universal AC adapter included"

## 3 CAR BATTERY ADAPTER

- + Power your Celestron computerised telescope from your car battery or a portable 12V DC power supply

## 4 FLASHLIGHT NIGHT VISION

Keep your night vision intact by using a red flashlight when observing! The Night Vision Flashlight uses two red LED's for even illumination. An easy-to-use thumbwheel adjusts the brightness. Square shape keeps the Night Vision Flashlight from rolling away. Powered by an included 9V battery.

## 5 NIGHT VISION RED HEADLAMP

Enjoy the freedom of hands-free illumination with this adjustable headlamp. It's perfect for setting up telescopes, handling star charts, and more. Seamlessly switch between two brightness levels, a blinking light, and an SOS setting.

The adjustable, ergonomic head strap provides a secure and comfortable fit, ideal for long nights under the stars. And with a 45° adjustable angle, you can direct the light where you want it, up to 100 hours of continuous use, ensuring reliable performance for all your adventures.

## 6 AC ADAPTER

Running your telescope off of AC power is hassle-free and much more reliable than other methods, especially in cool temperatures, when batteries can lose charge quickly. 2.5 & 5Amp available.

## 1 WEDGE NEXSTAR EVOLUTION/SE

- + Equatorial wedge for Celestron NexStar 6/8SE and Evolution Alt-AZ mounted computerised telescopes
- + Enables long exposure astrophotography and autoguiding by tilting the telescope's azimuth into an equatorial platform allowing it to track an arc around the polar axis
- + For beginner to intermediate planetary and deep space imagers
- + Captive hardware, tool-less operation, easily adjusts under load
- + All new hefty yet portable design
- + Sturdy latitude adjustment screw with easy to read scale and integrated Bubble level

## 2 TABLETOP TRIPOD - FOR EVOLUTION/SE

Eliminate the need for your full-height tripod and enjoy grab-and-go convenience when you add the Tabletop Tripod to your NexStar Evolution or NexStar SE telescope. This compact and sturdy accessory is half the size and weight of a standard tripod, making it perfect for travel. The low-profile legs and wide footprint offer added stability, while the convenient tabletop design makes it easier for some observers (especially children) to access the eyepiece.

## 3 TRIPOD FOR TABLETOP SSE DOBS

Enjoy a more comfortable viewing experience with your StarSense Explorer Tabletop Dobsonian telescope with this adjustable-height tripod. Adding this solid, sturdy tripod allows you to set up your Tabletop Dobsonian at the perfect viewing height for everyone in your group and avoid lower obstructions.

## 4 MOTOR DRIVE FOR ASTROMASTER & POWERSEEKER

Install this motor drive on your AstroMaster or PowerSeeker equatorially mounted telescope and start tracking the stars! Right Ascension tracking compensates for the Earth's rotation. Can be used in the Northern or Southern Hemisphere. For Celestron CG-2 & CG-3 equatorial mounts.

| ITEM CODE | MODEL                                | SRP INC. VAT |
|-----------|--------------------------------------|--------------|
| 93665-CGL | Wedge, NexStar Evolution/SE          | £459.99      |
| 93481-CGL | Tabletop Tripod - for Evolution/SE   | £159.99      |
| 93480-CGL | Tripod for Tabletop SSE Dobs         | £129.99      |
| 93514-CGL | Motor Drive, AstroMaster/PowerSeeker | £59.99       |

## 1 AUX PORT SPLITTER

You can easily add a second auxiliary port to your Celestron mount with the Celestron AUX Port Splitter. This parallel adapter plugs into the AUX or hand controller port of your computerised telescope and splits it into two, allowing you to connect the Celestron StarSense AutoAlign, or another peripheral device, to your telescope and still keep the hand controller plugged in.

## 2 VSP (VIBRATION SUPPRESSION PADS)

- + 3 vibration suppression pads go under your tripod legs to stabilize your telescope and prevent unwanted shaking
- + Made with Sorbothane®
- + Works on any surface

## 3 SKYPORTAL WI-FI MODULE

- + Align and control your telescope wirelessly using your smartphone or tablet and Celestron's free SkyPortal app for iOS and Android devices
- + Explore 100,000+ objects in SkyPortal's database. While you observe, view astroimages and listen to audio descriptions for hundreds of the most popular objects including the planets, Orion Nebula, Hercules Open Star Cluster, and more
- + Tap any celestial object you see in the sky to identify it instantly. Tap again and your telescope slews to that object, centering it perfectly in the eyepiece
- + Sky Tour feature generates a list of all the best stars, galaxies and nebulae to view based on your exact time and location
- + Wi-Fi module is compatible with all current Celestron computerised telescopes and select older models. Unit does not require batteries or external power

| ITEM CODE | MODEL                            | SRP INC. VAT |
|-----------|----------------------------------|--------------|
| 93919-CGL | Aux Port Splitter                | £39.99       |
| 93503-CGL | VSP (Vibration Suppression Pads) | £84.99       |
| 93973-CGL | SkyPortal Wi-Fi Module           | £199.99      |

**1 NEXSTAR PLUS HAND CONTROL W/USB, AZ & EQ**  
 NexStar+ Hand Control is compatible with altazimuth (AZ) NexStar or Equatorial (EQ) mounted telescopes with 40,000-object database.

**2 STARSENSE HAND CONTROL USB**  
 + StarSense Hand Control is compatible with the StarSense AutoAlign accessory for use with Celestron computerized telescopes with 40,000-object database

**3 SKYSYNC GPS**  
 + Upgrade your Celestron computerised telescope to GPS with SkySync  
 + Improve the speed and accuracy of alignments with 16-channel GPS  
 + Automatically updates the time and date.  
 + Plugs into the AUX port on the base of the telescope  
 + Compatible for all non-GPS Celestron computerised telescopes  
 + Ideal accessory for Nextstar & SLT models

**4 STARSENSE AUTOALIGN**  
 + Enables automatic alignment of your Celestron computerised telescope\*  
 + No need to identify or locate any star in the sky—StarSense automatically aligns your telescope, so you can begin observing in minutes  
 + Aligns in 3 minutes or less  
 + Provides advanced mount modelling—align on numerous stars throughout the sky for extremely precise GoTo pointing accuracy  
 + StarSense hand controller included  
 + Available for Celestron & Skywatcher Telescopes

| ITEM CODE | MODEL                                    | SRP INC. VAT |

## StarSense<sup>™</sup> Autoguider

The Celestron StarSense Autoguider is an all-in-one solution that makes using your telescope easier and more rewarding than ever. This powerful, compact device connects to your Celestron mount to enhance its pointing accuracy and help you create sharp, long-exposure images with ease. Whether you're an experienced astroimager or just starting in the hobby, adding this game-changing accessory will ensure you have more quality time under the stars.

### KEY FEATURES

- + **Automatic alignment:** Aligns your telescope to the night sky in about three minutes with no user input, thanks to Celestron's patented StarSense technology
- + **Precise GoTo:** Boosts the pointing accuracy of your Celestron mount, placing celestial objects in the centre of the field of view of high-powered eyepieces and small imaging sensors
- + **Autoguiding:** Tracks celestial objects accurately for pinpoint stars in long exposure astroimages, eliminating the need for a separate autoguiding camera, guidescope, and computer
- + **Assisted polar alignment:** Walks you through an easy, automated process to dial in the best polar alignment
- + **High-quality 4-element optical design:** Features a unique optical design by famed optical designer Mark Ackermann, with sharper optics than other mini-guidescopes
- + **Multiple ways to control:** Works with your NexStar+ hand control or CPWI telescope control software via a wired PC connection or WiFi

Telescope not included

| ITEM CODE | MODEL                   | SRP INC. VAT |
|-----------|-------------------------|--------------|
| 94008-CGL | StarSense Autoguider    | £599.99      |
| 94040-CGL | StarSense Autoguider V2 | £749.99      |

## 1 NEXSTAR 8 AND 9/11 OTA'S

### NEXSTAR 4/5/6 OTA'S

- + NexStar carrying case is designed to safely carry your NexStar 4/5/6 telescope as well as any Celestron 8"
- + Convenient storage zipper pocket that holds all your telescope's standard accessories with room to expand
- + EVA moulded to protect your telescope with a hard yet flexible shell (waterproof model only)

## 2 TELESCOPE & TRIPOD SOFT BAGS

The Telescope & Tripod Soft Cases are constructed from 900 denier polyester for durability and weather resistance. Its walls are lined with 16mm thick EPE foam to protect your gear. The bottom panel is reinforced with a hard layer of PVC for extra protection from minor bumps. On the exterior, you'll find hard rubber elements that provide extra strength and water resistance.

### 40" TELESCOPE CASE

- + Store your entire telescope kit—optical tube, mount, and tripod—in one protected, portable, grab-and-go case.
- + Ultra-durable 900 denier outer and super smooth inner polyester layers, sandwich 16mm thick EPE foam sheets to create a protective barrier for your telescope, tripod & mount.
- + A PVC-reinforced hard bottom panel provides extra protection from the elements and minor bumps
- + Three configurable, padded internal walls with Velcro strips help you get the perfect, customized fit for all your gear.
- + Stash accessories in the external zipped pocket, bonus padded accessory bag, or clip them to the case's external loops.

### 34" TRIPOD ONLY CASE

- + The ideal storage and transport solution for a wide range of tripods and their accessory trays with internal straps for a secure fit.
- + Ultra-durable 900 denier outer and super smooth inner polyester layers, sandwich 16mm thick EPE foam sheets to create a protective barrier for your telescope, tripod and mount.
- + Store accessories in the external pocket or clip them to the case's external loops.
- + Padded shoulder strap allows you to carry your tripod to your observing site hands-free.

## 3 PADDED CARRYING BAG FOR 8" OPTICAL TUBES

- + Store your 8" Schmidt-Cassegrain optical tube in this protected, portable, grab-and-go case
- + Ultra-durable and water resistant, 900 denier outer and super smooth inner polyester layers, sandwich 16mm thick EPE foam sheets to create a protective barrier for your telescope
- + Multiple zippers allow for easy packing and removal of the optical tube
- + External, hidden zipped pocket stores your eyepieces and other accessories
- + Padded shoulder strap allows you to carry your optical tube to your observing site hands-free

## 4 WEATHERPROOF TELESCOPE COVER

As much as we plan our observing or imaging sessions for perfect weather, the sky doesn't always cooperate. Celestron's Weatherproof Telescope Cover gives you peace of mind when your gear needs to stay set up—but you're not actively using it.

- + All-Weather Protection: Shields your telescope from light rain or snow, dust, and harmful UV rays, providing year-round protection in outdoor environments.
- + Snug, Customizable Fit: Secures around your tripod legs with an integrated drawstring, keeping your mount, optical tube, and attached accessories inside.
- + Durable, Weatherproof Materials: Features an aluminum-laminated outer shell for water resistance and durability, paired with a soft 210D polyester inner lining.
- Thermal Shielding: Helps regulate temperature to prevent heat buildup or rapid cooling, reducing the risk of condensation inside your optical system.
- Compact and Travel-Friendly: Folds into a lightweight, space-saving form for easy transport and storage—perfect for mobile astronomers.
- Universal Fit for Most Celestron Telescopes: Works with a wide range of setups up to 11" aperture. See full compatibility list below.
- Easy to Clean: Built with materials that allow for quick and simple cleaning after outdoor use.

## 1 UNIVERSAL SMART PHONE ADAPTER 3-AXIS & NEXYZ DX KIT

NexYZ fits any eyepiece from 30 mm to 60 mm in diameter including telescopes with 1.25" and 2" eyepieces, spotting scopes, monocular, and binoculars. NexYZ will also attach to microscopes with the addition of the included microscope adapter ring, which takes the usable diameter down to 25 mm, the size of a standard microscope eyepiece. A strong spring and a threaded twist lock provide a two-level strong and secure grip on the optical instrument's eyepiece, so you can image with confidence.

NexYZ also accommodates a vast range of smartphones. The phone platform is fully adjustable and can fit any device - usually with the case still on. Even larger "tablets" like the iPhone 8 Plus and latest Samsung Galaxy devices work perfectly. The secure platform stands up the weight of these heavier devices with ease.

If multiple people want to capture a shot through your optic, NexYZ's simple spring-loaded clamps make it easy to remove one device and replace it with another in seconds. NexYZ is the ideal solution for star parties and group bird walks where everyone wants their own shot of the action.

## 2 NEXGO SMARTPHONE ADAPTER & NEXGO DX SMARTPHONE ADAPTER W/REMOTE

A complete digiscoping solution: NexGO connects your smartphone to an eyepiece while the DX model includes Bluetooth shutter release button helps you get a steady shot image every time.

## 3 SMARTPHONE BASIC ADAPTER, 1.25" & BASIC PHONE ADAPTER DX KIT

This smartphone adapter connects your smartphone to a telescope, binocular, spotting scope, or microscope, so you can capture images and video through the eyepiece.

Easy as X-Y-Z

What makes NexYZ different from other smartphone adapters? The three-axis adjustment. Most adapters rely on you placing your phone perfectly on the platform and only offer limited adjustment in two axes. But NexYZ gives you the power to place your phone on the platform, centre it over the eyepiece with the X and Y knobs, and then move up or down over the eyepiece until you have the entire field of view in your shot.

And even though this adjustment is ultra-precise, it's still quicker and easier than with other adapters. From start to finish, the process takes only take about 30 seconds, including the time it takes to insert the phone into NexYZ, attach NexYZ to an eyepiece, start the camera app, and centre the camera over the eyepiece using the knobs. If you switch phones, eyepieces, or optical instruments, you will need only slight adjustments to re-centre the camera over the new eyepiece.

You can also switch your image from portrait to landscape simply by turning the padded eyepiece clamp and readjusting the X, Y, and Z axis to realign your phone with the eyepiece.

DX model includes a Bluetooth adaptor

Smartphone & telescope not included

## 1 T RINGS FOR CANON M, SONY E, EOS & NIKON AF

A T-Ring is one of the first accessories you will need if you want to take pictures through a telescope or spotting scope.

## 2 T-RING, CANON MIRRORLESS M-MOUNT

## 3 T-ADAPTER, SCT 5, 6, 8, 9.25, 11, 14 & NEXSTAR 4, C90 MAK & C130 MAK

T-Adapter attaches an SLR or DSLR camera to a Schmidt-Cassegrain telescope for prime focus photography.

## 4 T-ADAPTER, UNIVERSAL – 1.25” & T-ADAPTOR WITH BARLOW

The Celestron Universal T-Adapter connects a DSLR or SLR camera to a refractor for prime focus photography.

## 1 M42 SPACER RING KIT

Adjusts back-focus between your camera and telescope for the best astroimaging results. Kit includes 3 spacer rings of different lengths (7.5mm, 12mm, 30mm)

## 2 PIGGYBACK MOUNT - NEXSTAR 5, 6, 8

- + A piggyback ride for your camera! Let your telescope do the driving while your camera takes beautiful wide-angle images of the sky
- + Use your own camera lenses to take photographs of the Milky Way, nebulae, the moon, and more
- + Attaches easily to the top rear of any SCT in minute

## 3 DELUXE OFF-AXIS GUIDER

The Off-Axis Guider is an essential astroimaging accessory for long focal length telescopes that require the most accurate guiding possible. The Celestron Off-Axis Guider uses a prism to intercept a small portion of the telescope's focal plane (outside the field of view of the main imaging camera) to locate a guide star. Any movement seen by the guide star will be the exact same movement seen by the imaging camera

## 4 FOCUS MOTOR FOR SCT/EDGE HD

The Focus Motor provides electronic focusing for Celestron Schmidt-Cassegrain (SCT), EdgeHD, and RASA telescope optical tubes. With the focus motor installed, you can bring celestial objects into sharp, precise focus using your telescope's hand controller or a computer instead of using the focuser knob. A focus motor is great for visual observers who want to dial in exact focus (especially those with dexterity issues) and a must-have accessory for astroimagers. With a motorized focuser installed, an astroimager no longer needs to be physically near the telescope to focus an image. Combined with computerized control of the mount and camera, the focus motor enables the imager to gather data remotely from a backyard observatory, or even a telescope located hundreds of miles away.

## 5 REDUCER/CORRECTOR F/6.3

Imagine having two telescopes in one – a long focal length instrument for lunar and planetary work and a short focal length scope for deep sky observing and astrophotography. With the Celestron Reducer/Corrector Lens, that's precisely what you get.

| ITEM CODE   | MODEL                             | SRP INC. VAT |
|-------------|-----------------------------------|--------------|
| 93618-CGL   | M42 Spacer Ring Kit               | £49.99       |
| 93609-CGL   | Piggyback Mount - NexStar 5, 6, 8 | £39.99       |
| 93648-CGL   | Deluxe Off-Axis Guider            | £314.99      |
| 94155-A-CGL | Focus Motor for SCT/EDGE HD       | £244.99      |
| 94175-CGL   | Reducer/Corrector f/6.3           | £169.99      |

A dew remover system is designed to eliminate dew from telescope optics by keeping the optics slightly warmer than ambient, or above the dew point. Power is applied from a dew controller via flexible dew heaters, usually wrapped around the telescope tube, near to the cell housing the optics.

## 1 SMART DEWHEATER CONTROLLER 2X & 4X

Connects directly to the power port and thermistor port of Celestron Dew Heater Rings for automatic “smart control” of heater ring - most efficient use of power to keep the telescope’s Schmidt corrector free of moisture even under heavy dew conditions. Each heater port has an associated thermistor port for “smart control” of the heater power output.

Also compatible with other manufacturer’s heating bands (requires optional #94037 Thermistor) Does not require connection to any external controller (i.e. hand control or PC) to provide “smart control” functionality but connection to external controller provides adjustment of settings & monitoring of real time data.

## 2 ALUMINIUM DEW SHIELD W/COVER CAP AVAILABLE IN 6” TO 14”

Helps prevent dew from forming on the surface of SCT Schmidt Corrector. Also functions as a lens shade to prevent off-axis glare from entering the optical system. Interior lined with black velvet to further prevent glare.

## 3 DEW HEATER RING FOR SCT AVAILABLE IN 5” TO 14”

Keep your 8” SCT, EdgeHD, or RASA Schmidt corrector free of dew all night using Celestron’s Dew Heater Rings. Heating element is integrated into the Schmidt corrector’s retaining ring, this provides several benefits. Appearance is better than external heating bands.

Heating is much more efficient because the heating element directly heats the Schmidt corrector rather than inefficiently applying heat to the telescope tube or the front lens cell. You’ll always have the heater ring with you since it is integrated into the optical tube.

## 4 THERMISTOR, SMART DEWHEATER CONTROLLERS

Allows “smart” control of other manufacturer’s dew heaters when used with Celestron Smart DewHeater Controllers by monitoring the temperature of the dew heater.

## 5 SCT FLEXIBLE DEW SHIELD 6” - 8” & 9.25” & 11”

Prevents excess moisture in the air from forming condensation on the corrector lens. A dew shield also helps block stray light from entering the telescope for better viewing and astrophotography. Available in 6-8” or 9.25-11”

## 6 AUX POWER CABLE FOR SMART DEWHEATER CONTROLLERS

Plug this AUX port cable into one of your controller’s 12V DC power outputs and one of its AUX ports. When you switch the controller on, the cable provides power to run accessories through the controller’s other AUX port(s), such as the SkyPortal WiFi Module (for wireless PC connection) or the Celestron Focus Motor.

## 1 LENS PEN OPTIC CLEANING TOOL

- + Keep your optics clean with the innovative LensPen
- + Use the soft retractable brush for removing loose particles & dust
- + The LensPen is safe and easy-to-use. Keep one handy for all your optics
- + Clean smudges, fingerprints, pollen, and other sticky substances from the optics with the special cleaning element. No liquids are used...nothing to spill or dry out

## 2 LENS CLEANING KIT

- + Lens cleaning kit for all your optics
- + Provides streak-free results
- + Kit contains 10 lens wipes, cleaning fluid, a lens cloth and a retractable lens brush
- + Easily transportable in a soft cloth pouch with a convenient belt loop

## 3 USB COOLING FAN FOR DOBSONIANS

The Celestron USB Cooling Fan is the ideal cooling solution for your StarSense Explorer 10" Dobsonian telescope. For those who can't wait to observe, this handy accessory cools the primary mirror to the ambient outdoor temperature faster.

## 4 FINDERSCOPE STARPOINTER

The Star Pointer Finderscope adds "point & look" functionality to any telescope! This red dot finder keeps the sky right-side up, matching what you see with your unaided eyes. The adjustable red dot is bright enough to see day or night. Attaches to just about any telescope thanks to the small footprint, even works great with astronomical binoculars and spotting scopes. Includes mounting base and a long-lasting CR2032 3V battery.

## 5 STARPOINTER PRO FINDERSCOPE

- + Designed by astronomers for astronomers, this premium finderscope allows you to precisely zero in on your target
- + Projects a dual-circle reticle, not a red dot that can obscure your subject
- + Larger 40 mm optical window offers a wider field of view so you can acquire targets quickly & easily
- + Brighter LED for easy visibility during the day
- + Easy dovetail connection; no tools required

## 6 RIGHT ANGLE CORRECT IMAGE FINDERSCOPE

- + Comfortable Right-Angle Design: Keeps your neck and back at ease during long sessions
- + Correct-Image Optics: Produces natural views—ideal for both day and night use
- + 9x Magnification with 50mm Aperture: Captures bright, sharp visuals with a 5° field of view
- + Double-Crosshair Reticle: Fine-etched lines help you center targets precisely without obscuring stars
- + Adjustable Eyepiece Orientation: Rotate for the perfect viewing angle
- + Durable Bracket & Dovetail Base: Includes a dual-ring bracket with oversized thumbscrews and a built-in dovetail that fits most Schmidt-Cassegrain and EdgeHD optical tubes

| ITEM CODE | MODEL                                 | SRP INC. VAT |
|-----------|---------------------------------------|--------------|
| 93575-CGL | LensPen - Optics Cleaning Tool        | £14.99       |
| 93576-CGL | Lens Cleaning Kit                     | £16.99       |
| 94256-CGL | USB Cooling Fan for Dobsonians        | £24.99       |
| 51630-CGL | StarPointer Finderscope               | £24.99       |
| 51635-CGL | StarPointer Pro Finderscope           | £34.99       |
| 93788-CGL | Right Angle Correct Image Finderscope | £179.99      |

## 1 BINOCULAR VIEWER, STEREO

- + Binoviewers improve views dramatically, producing a three dimensional effect that you'll love!
- + Using two eyes for observing instead of one lets you see more detail, reduces eye fatigue and increases contrast
- + For use with catadioptric telescopes and other telescopes with sufficient back focus
- + Includes an aluminium carry case with foam-lined interior
- + Requires a matching pair of 1.25" eyepieces, sold separately

## 2 1.25" VISUAL BACK

Threads onto the rear of Celestron 5" - 11" Schmidt-Cassegrain telescopes.

## 3 SCT TO 2" VISUAL BACK

Replace your 1.25" visual back with this SCT to 2" Adapter and enjoy stunning views through 2" eyepieces and other accessories

## 4 1.25" ERECT IMAGE 45° DIAGONAL

A great accessory for daytime terrestrial viewing with your telescope. This 1.25" diagonal produces right side up and left-to-right correct images when used with refractors and catadioptric (Schmidt-Cassegrain) telescopes. Inserts into 1.25" focusers or visual backs. Accepts standard 1.25" eyepieces.

## 5 1.25" STAR DIAGONAL

Fits telescopes with 1.25" focusers or visual backs, 90 degree viewing angle, best for observing objects overhead. Accepts standard 1.25" eyepieces, Barlow lenses, and other accessories with a 1.25" insert barrel.

## 6 DIELECTRIC MIRROR DIAGONAL WITH TWIST-LOCK

Ensure maximum light transmission without loss of optical quality with the Celestron Dielectric Star Diagonal, 1.25" with Twist-Lock. Upgrade your existing star diagonal to this premium one and enjoy brighter, sharper images without replacing your telescope. Available in 1.25" & 2"

## 7 2" MIRROR DIAGONAL WITH XLT

A 2" diagonal is required if you want to use 2" eyepieces when observing with your telescope. The larger 2" barrel allows you to see a bigger percentage of the telescope's light cone, which works wonders for capturing faint deep sky objects with low surface brightness.

**1 OBSERVING THE NIGHT SKY (PAPERBACK BOOK)**

An ideal beginners guide to astronomy for all. Perfect for new telescope users. Showing you how to plan your stargazing and explains what you can see. It explains how to choose between binoculars and telescopes and what you can see using them. Helping you explore the Solar System and Galaxy, along with a comprehensive guide to photographing the Moon.

**2 CELESTRON SKY MAPS**

Learn the night skies of the Northern Hemisphere with Celestron Sky Maps! This classic collection of seasonal star charts, topped off by a glow-in-the-dark luminous star finder, or planisphere, has been around for years and years!

Celestron Sky Maps are made from 13-1/4" x 11-1/4" water-resistant, heavy-duty card stock for years of enjoyment and use. A plastic spiral comb holds the pages together securely, but allows them to lay completely flat for use in the field.

**3 OBSERVERS MOON MAP, 24" X 24"**

Celestron has joined forces with master lunar cartographer Ralph Aeschliman on a two-sided Moon Map. This quality map provides you a great way to familiarize yourself with the Moon, our neighbouring world.

- + Features a directory of the best craters and lunar features with coordinates to find them
- + Detailed lunar observing tips and information about key lunar regions on the reverse side of the map
- + Lunar topography by renowned lunar cartographer, Ralph Aeschliman
- + Map is 24" x 24" for easy-reading or display, but folds to just 8" x 4" for easy transport to your observing site
- + Map is waterproof and tear resistant
