FANTASTIC ACCESSORY SET OFFER!!

Buy ANY Sky-Watcher or TAL telescope from ANY UK dealer & buy this superb Sky-Watcher Eyepiece, Filter, Night Vision Torch & User Guide Set for just £99.00 (SRP £175.00) directly from OVL!!

MORE INFO

" I have used a great number of telescopes; some are good, some mediocre and some bad. To me the Sky-Watcher range of instruments are very good indeed, and suited to amateurs of all kinds – and they are not priced out of the market! Excellent value. Use them and enjoy them."

Sir Patrick Moore CBE FRS (1923 to 2012)

[DESCRIPTION](#)[REVIEWS](#)[GALLERY](#)

The Capricorn-70 is a classic two-element, air-spaced achromatic refractor telescope of very good quality, and makes an excellent choice for the more serious novice astronomer. It will provide memorable views of the Moon, Stars, Star Cluster, Bright Planets, Nebulae and Galaxies. Supplied with the EQ1 equatorial mount, which when polar aligned, will allow you to easily track objects as they move across the night sky via its slow motion control cables.

"Fine Optics and Accessories" "Meets all expectations and is the perfect starter scope"

BBC Sky At Night Magazine

Magnifications (with optics supplied): x36, x72, x90, x180

Highest Practical Power (Potential): x140

Objective Lens Diameter: 70mm

Telescope Focal Length: 900mm (f/12.8)

Eyepieces Supplied (1.25"): 10mm & 25mm

x2 Barlow Lens

Red Dot Finder

1.25"/31.7mm Star Diagonal

Multi-Coated Objective Lens

EQ1 Equatorial Mount

Aluminium Tripod with Accessory Tray

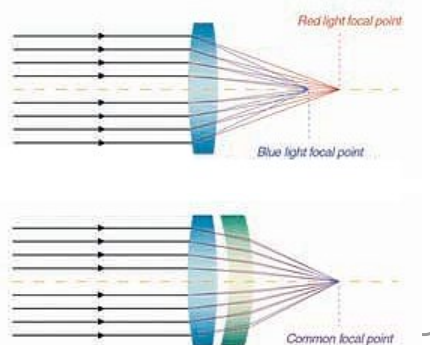

Tube material: Aluminium

36% more Light Gathering than 60mm

AIR-SPACED TWO-ELEMENT ACHROMATIC REFRACTORS

An ordinary single lens brings different wavelengths of light to different focal points

All Sky-Watcher Refractors are built with air-spaced two-element lenses, which reduce chromatic aberration more than standard doublet lenses.
